

1                   **ABSTRACT OF THE DISCLOSURE**

2

3           Apparatus for use with a hand manipulable

4   flowable material dispenser, the combination comprising

5   a dispensing nozzle associated with the dispenser to

6   dispense material, and a spreader surface associated

7   with the nozzle whereby the dispenser may be

8   manipulated to cause the spreader surface to spread

9   material dispensed via the nozzle, and the spreader

10   surface can be used to spread material around after it

11   is dispensed.
